## **ABOUT CORTEX**

Cortex is a feature rich Digital Asset Management application that allows Multinationals to consolidate all of your digital assets (photo, video, audio, file, PDF, graphics, etc.): production and indexing, distribution, multilingual research, online commerce, the calculation of royalties, etc.

Tech stack: C#, Javascript, SQL, Agile, TDD, UI/UX, integrated with new emerging technology

Target: grow further the awesomeness of CORTEX

### **What we are looking for:**

Orange Logic was founded by an engineer, not a business person. This makes all the difference to you and how much you will enjoy your job. The quality of our software is the most important thing, not the marketing of it. Developers are the most important people at Orange Logic.

We are looking for a team of very talented engineers that will design and implement new features for our software and to join a team of dedicated and smart colleagues who share your desire to build the world's most sophisticated software in managing digital media.

**What we will offer you:**

- ★ Be directly involved in the company's objectives , hopefully you are fond of new technologies and clever algorithms.
- ★ Flat structure, simple processes, and transparency. Projects are assigned according to your strengths and interests.
- ★ Work in a sunny modern office with high-quality ergonomic chairs, and multiple screens...

**Benefits include:**

- ★ Very attractive salary package – we are committed to paying you what you really deserve.
- ★ **Year end bonus**
- ★ 18 days of annual leave per year + days for overseas company trip
- ★ Abundant allowances (lunch, gym, parking, birthday voucher, etc.)
- ★ Premium healthcare insurance
- ★ Free snacks, soft drinks, fruits, and coffee

**Recruitment process:**

1. HR interview
2. Technical Test
3. Technical Interview 1 Technical Interview 2 Interview with CEO
4. Reference check (2 managers at current or previous company)
5. Offer discussion
